Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risk.

Effective July 1, 2022, the fund will pay an annual fixed administration fee of 0.20% for Class A units, replacing the variable operating expenses being charged to the fund.

On September 17, 2020, the Canadian Securities Administrators published amendments that, effective June 1, 2022, will prohibit the payment of trailing commissions to order execution only (referred to as *OEO*) dealers, which includes discount brokers and other dealers that do not make a suitability determination, in connection with an investor's purchase and ongoing ownership of classes of units that pay a trailing commission to dealers (referred to as the *OEO Trailer Ban*).

As a result, effective June 1, 2022, Class A units of the Fund are no longer available to investors who hold these units in an account with a discount broker. To ensure compliance with the new rule, starting on or about March 25, 2022, Class A units of the Fund held in an account with a discount broker were converted into a non-trailer paying class of the Fund offering a lower management fee.

On March 18, 2022, the Canadian Securities Administrators announced temporary exemptions to the *OEO Trailer Ban*, such that during the period from June 1, 2022 to November 30, 2023, *OEO* dealers and fund organizations are exempted from the *OEO Trailer Ban* for investors who transfer Class A units of the Fund to an *OEO* dealer account on or after June 1, 2022, provided that the dealer implements a rebate equal to the amount of the trailing commission paid by the Manager. For more information, please contact your dealer.

How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

CIBC has rated the volatility of this fund as **Medium**.

This rating is based on how much the fund's returns have changed from year to year. It does not tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

A word about tax

In general, you will have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan such as a Registered Retirement Savings Plan (RRSP) or a Tax-Free Savings Account (TFSA).

Keep in mind that if you hold your fund in a non-registered plan, fund distributions are included in your taxable income, whether you receive them in cash or have them reinvested.

How much does it cost?

The following tables show the fees and expenses you could pay to buy, own, and sell Class A units of the fund. The fees and expenses - including any commissions - can vary among classes of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

For Class A units, a trailing commission of 0% to 1.00% of the value of your investment each year (\$0.00 to \$10.00 each year on every \$1,000 invested) is paid from the management fee.
